

Wellness Spas®

HEALTH & SWIM SPAS by

Wellness Spas®

The Wellness Health and Swim Spa series has been developed with the sole objective to bring together the health benefits that can be achieved with hot water, exercise, hydro massage therapy and swimming - all built into one beautiful product, just for you and your family.

Water resistance has long been proven to be a superior medium for strength, cardio and endurance training. Owning a Wellness Spa gives you anytime access to this medium and provides an experience that is so enjoyable that you'll find it easy to maintain your new healthy lifestyle by simply spending time in your new Wellness Spa each and every day.

Our models range from the hyper-therapeutic Wellness I hot tub (developed in conjunction with the Arthritis Research Center of Canada's Consumer Advisory Board) to our large Swim Spas which produce an unrivalled current you can swim against indefinitely. Our health spas each come exercise equipment ready, allowing resistance bands and rowing oars to be incorporated into your fitness routine.

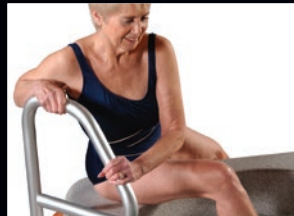

When you're ready to kick back and relax, each model comes equipped with Luxury Trillium massage jets that rejuvenate your muscles and refresh your body with a deep tissue massage. All your massage jets are individually adjustable allowing you to decide where you want to concentrate your hydrotherapy treatment.

Let us show you how easy it can be to enjoy and commit to a healthy lifestyle. True wellness can only be achieved by making a permanent change to your day-to-day life. Start today and save the endless membership fees, time and money to get to and from your fitness center and all the inconvenience that has consistently hampered your success in the past. Your Wellness Spa will improve your fitness and lessen symptoms associated with arthritis, sleep disorders, stress, type 2 diabetes and all right from the comfort of your own home and ready when you are.

Wellness I

Built for Positive Health and Arthritis Relief

The Wellness I (One) was developed in partnership with the *Arthritis Research Center of Canada's Consumer Advisory Board* to directly target ailments associated with arthritis and improve the day-to-day life of those who suffer from this potentially debilitating condition. The Wellness I is extra deep to promote a comfortable upright seating position while still allowing for your upper body to remain submerged under the therapeutic hot water. This spa has a dedicated super massage seat that can massage your entire body at once, providing lasting relief from muscle pain and irritated joints. The Wellness I also has easy access steps, underwater safety light and can be ordered with entry handrail, center stability ring, resistance bands, rowing bars and much more. The Wellness I is made to promote positive health and makes feeling wonderful each and every day as easy as stepping into your hot tub.

211 x 211 x 123 cm

JETS 22 NA 1x 3HP
INT 1x 3HP SF

The Wellness III is a hot tub addition to your Wellness II or Wellness II Lounge Swim Spa. The Wellness III is installed at one end of your swim spa, instantly providing all of the amazing health benefits that go along with hot water hydrotherapy. Every Wellness III hot tub comes standard with commercial-grade Hydro Cyclonic Filtration® and powerful Luxury Trillium Massage Jets.

The Wellness III is the perfect alternative to an all-in-one or dual zone swim spa as it can be separated and moved independently from the Wellness II Swim Spa. The Wellness III has independent controls so that the water can be set at a higher temperature than the attached swim spa for more effective hydrotherapy. The Wellness III also has an independent plumbing system and cover allowing the attached swim spa to be drained and winterized if the intended use is seasonal.

The unique shape, compact design and detachment option of the Wellness III makes it especially desirable in situations where installation is not easily accessible or if you intend on not leaving your unit behind if you move residence in the future.

Wellness IV

Hot Tub and Full Sized Swim Spa. Dual Zone Perfection.

The largest Wellness Spa we build. The gigantic dual zone Wellness IV is a swim / exercise spa that includes a full-size, independently controlled hot tub. Truly the complete all-in-one wellness package ready for your backyard or exercise room.

Purification Systems

The Very Finest In Water Treatment for the Freshest Feeling Spa Environment

All hot tubs require a method of water purification and just like swimming pools, hot tubs and swim spas require sanitizers and filtration systems to maintain clean water. Just as filtration system will use filters to remove debris from your spa, purification systems use light, oxygen and salt generators to actively attack unwanted contaminants in your spa water. Having a purification system installed on your spa will reduce the amount of additional chemicals needed to maintain clean water. Automatically sanitizing the water, these purification systems are built into the spa.

O₃ One Ozone System

Your hot tub will filter all of the water in your spa within a matter of minutes. However the fabric of your filter is limited to capturing only the contaminants that are larger than 18-20 microns (*Dual Core will filter to 10 microns*). To remove microscopic organic contaminants you need an ozonator. Ozone is one of the most powerful oxidizers known today. Ozonators produce energetic oxygen or "ozone" that oxidizes foreign contaminants.

O₃ One PLUS Ozone System

High Performance Ozone

The O3 One Plus Ozone system produces a higher concentration of ozone (more ppm) that is introduced into your spa water as it travels through the spas plumbing system. Having a higher concentration of ozone equates to less chemical usage and water that has a high clarity level.

Crystal Clear Purification Chamber®

Ozone Efficiency Booster

The Crystal Clear Purification Chamber® gives ozone a longer period of time to penetrate organic materials while in their energetic state (before converting back to oxygen) thus drastically increasing its efficiency. Energetic ozone dissipates before entering the Hot Tub (or Swim Spa) bathing area.

EcoClean® UV Sterilizer

Complete Bacteria Annihilation with an Intense UV Sterilization Tube.

The EcoClean UV Sterilizer uses ultraviolet light that is calibrated to a specific light spectrum to effectively eradicate 99.9 percent of all bacteria that is exposed to it. UV sterilization systems have long been used for purifying drinking water and now it's sterilization prowess can be used to effectively purify your Hot Tub or Swim Spa water.

EcoClean® Salt Water Generator

A refreshing alternative to traditional spa sanitation

The EcoClean® Salt Water Generator is an eco-friendly alternative method of sanitizing your spa water. The continuous generation of sodium chloride reduces the amount of sanitizer needed for spa operation. Bathing water is softer, odorless, easy on sensitive skin and requires less frequent monitoring than standard sanitation methods.

THE BENEFITS OF HYDRO CYCLONIC TECHNOLOGY

No dirty filter sitting in the hot tub water with the bathers.

Captured contaminants will not re-enter the spa water when changing the filter or when pumps are deactivated.

The Water Diversion Blade® disperses water and contaminants evenly around the outside of the filter resulting in more efficient filtration.

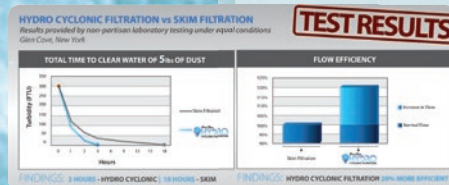

Up to 175 sq.ft. of filter media (*largest available in any hot tub*) for superior water flow and less strain on your spas' components.

Filtration Systems

We've been building spas for a long time now and know how important it is to have clean water in your hot tub. For maximum enjoyment, peace-of-mind for you and your family and the longevity of your equipment nothing is more crucial than the condition of your spa water. For this reason Wellness Spas come standard with a commercial-grade pressurized Hydro Cyclonic Filtration® System to ensure your spa water receives the absolute best treatment available.

83% Faster
20% More Efficient
Than Skim Filtration

Crystal Clear and Beautiful Spa Water

All Wellness Spas® are equipped with filtration systems that some may call "excessive" for the amount of water they are responsible for filtering. However, we don't believe you can be excessive in the quality of the equipment that is responsible for ensuring you and your family enjoy only the cleanest, clearest spa water. Your swim spa (or hot tub) is where you go to exercise and relax. Nothing can ruin this experience quicker than water that appears uninviting. We never want one of our spas to discourage use due to an inferior state of water clarity. To ensure this never happens to you and your loved ones, Wellness Spas come standard with an advanced filtration system that will effortlessly care for your spa water. Our Hydro Cyclonic Filtration® System and powerful Twin Filter Canisters will keep your spa water clean, clear and always inviting.

Premium Upgrades

LIGHTING

Wellness Spas® offer an amazing array of LED lighting options to truly let you customize your spa experience. With the ability to toggle or randomly play through a spectrum of different solid colors, you can set the mood to fit any occasion.

Note: Hot Tub model shown below for general light placement reference.

WORLDWIDE SPA REMOTE

Monitor and control your Wellness Swim Spa or Hot Tub from anywhere in the world with your smart-phone*. Adjust water temperature, set filter cycles, activate jets, toggle lights on and off and even sync your spa clock with a touch of a button. This new and innovative application gives you remote control of your Wellness Spa® via your smart phone.

**Requires Internet access. Find the app today on the Apple App store or Google Play Store by searching "Coast Spas".*

SUBWOOFERS

We have two subwoofer options available to bring your audio system to life with additional low-pitched frequencies (bass).

Standard Subwoofer

Gives an extra punch to your music.

Extreme Subwoofer

Powerful Subwoofer and amplifier. The best choice for the ultimate sound.

EXTERIOR

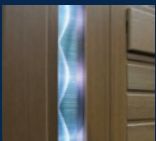

Cedar Top Rail
Available on Wellness I Only
(req. Cedar Cabinet)

EXTERIOR LIGHTS

Exterior Cabinet Sconces
Add Four or Six exterior light sconces to your spa.

Holographic LED Lighting
Two mesmerizing LED light strips installed on the front of the spa. Alternates color to match spa interior lighting.

MASSAGE THERAPY

Super Charged Air Blower
Get a huge power boost when forced air is injected into the supply lines going to your hot tub jets. If you're serious about hydrotherapy, you'll want to add the Super Charged Air Blower.

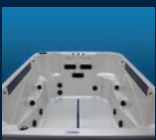

Air Blower with Additional 18 Stainless Steel Jets
Enhance your massage. Forced air mixed with water provides superior hydrotherapy.

SWIM SPA UPGRADES

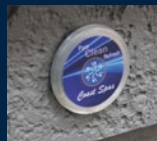

Swim Tether
Great for learning to swim against the powerful river jets. Keeps your body straight and in path of the current. Advanced swimmers can also use for additional resistance in combination with the River Jet Current.

Tile Accent
Both visually pleasing and functional. Get the tile package for your Wellness Swim Spa and have a defined swim line elegantly integrated into the spa bottom and a beautiful twin accents along the waterline.

PURIFICATION

Refresh Button
Simply press to refresh your water. Quickly run your water through a filtration cycle before entering or after bathing.

Ozone Generators:
O3 One - Standard ozonator
O3 One Plus - Produces more ozone than standard ozonator.
Add: Crystal Clear Purification Chamber® (increased performance)

ECO CLEAN
Salt Water System: Softer and less abrasive water for sensitive skin than standard chlorine based systems.

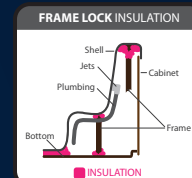

UV STERILIZER
Powerful water sterilizer. Uses Ultraviolet light to remove microscopic contaminants.

ENERGY EFFICIENCY

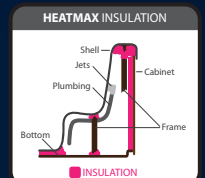

Wellness Spas give you more options and insulation is no exception. We use premium insulation materials with high R-values to ensure your spa has the best thermal resistance to exterior temperatures.

Hot Tubs (Wellness I and III) come standard with Framelock Insulation.

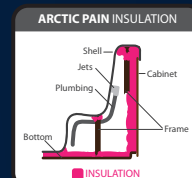

Swim Spas (Wellness II, III, IV and V) come standard with Partial Foam Insulation.
